DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, 23-27, drawn to a carbon material and a method for producing a coated material.

Group II, claim(s) 13-22, 32-37, drawn to a second method for producing a carbon material.

Group III, claim(s) 28-31, drawn to a lithium secondary battery.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

For claim 1, Applicant has not provided evidence to show that the carbon material is novel and contains a corresponding special technical feature and has not shown any data that the carbon material is nonobvious for use in a lithium secondary battery and would therefore get unexpected results. For example, JP 6-267531 teaches carbonaceous material particles satisfying condition

(1) are mixed with organic compound particles satisfying condition (2). The mixture is heated to carbonize the organic compound. The carbonaceous material particles are covered with a carbonaceous material satisfying condition (3). The conditions are as follows: (1) D_{002} is up to 3.37 Å [0.337 nm], the true density is at least 2.10 g/cm³; D_{002} x-ray wide angle diffraction is at least 3.38 Å [0.338 nm] and Tanaka et al. (5,344,726) teaches in column 1, lines 45-53, a carbon anode for a secondary battery in which a carbon active material of the carbon anode is covered with an amorphous carbon particle. The interlayer distance of the carbon in the c-axis direction ranges from 0.337 to 0.360 nm. Therefore, Groups I, II and III do not provide any contribution over the prior art.

3. A telephone call was not made to request an oral election to the above restriction requirement because of the complexity of the invention to choose, and therefore did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
